OVERVIEW

SET-UP

To make sure your humidifier works effectively please spend 2 minutes following these initial set-up instructions! Please wash and dry your hands before setting-up, to ensure they are clean.

You will need to ensure that the two cotton swabs inside the humidifier have FULLY absorbed moisture before it can be used. To set-up you will need to untwist the top of the humidifier and you will see two prongs. Each prong contains a cotton swab in a plastic casing. Remove each prong by gently pulling it from the top of the humidifier.

Take out the cotton swab and submerge it fully in clean, cool water for at least 30 seconds.

Once you have done this, reassemble the prongs (by placing the cotton pad back inside the plastic casing) and push them back into the lid firmly. Turn the humidifier spray on with one short press of the on/off button and you should see mist appear.

This needs to be repeated at anytime you use a fresh set of cotton swabs (every 3 months).

MODES

A SHORT press of the 'on/off' button controls:

- Dual spray mode (maximum volume of mist)
- Single spray mode (minimum volume of mist)

A LONG press of the 'on/off' button controls:

- Light

HOW TO USE

- Remove the top of the humidifier by twisting to the right and then lifting it off.
- Pour 300ml of clean tap water or purified water into the bottom of the humidifier (the water tank). Do not overfill the water tank.
- Securely close by placing the top back onto the water tank and twisting to the left, make sure it is tightly closed to avoid spillage.
- Keep the humidifier within an arms-length or up to 150 cm away for best results.

MIST & LIGHT

- SHORT press of the 'on/off' button controls the spray. To turn the spray-on, one SHORT press of the 'on/off' button will start the dual spray mode (maximum mist volume).
- After the dual spray mode is on, one further SHORT press of the 'on/off' button will turn on the single spray mode (minimum mist volume).
- In the single spray mode, it automatically switch between the left and right mister every 3 sec.
- A LONG press of the 'on/off' button controls the nightlight. You can use the nightlight mode with or without the mist mode. One LONG press of the 'on/off' button will turn it on. One LONG press of the 'on/off' button will turn it off.

CHARGING

- FLASHING RED LIGHT indicates that the humidifier needs to be charged.
- When the humidifier has run out of charge, plug in the USB charging cable to the charging port found at the back of the humidifier. Charge for 3 hours. Unplug the charging cable before use.
- The humidifier will automatically shut down after 3 hours of dual spray use and after 6 hours of single spray use. You will need to restart it manually after this period of time.

CARE

- The Hydrating Portable Humidifier should be kept clean and sanitary the same way as a reusable water bottle.
- As there are microbes in tap water, it is very important to follow these cleaning instructions.
- When it is not in use, ensure that the humidifier's water tank is fully emptied and both the water tank and top of the humidifier are fully dried (either air-dried or dried with a clean paper towel).
- Once a week, clean the water tank with soap and water, leave to air dry or dry with a paper towel until fully dry.
- DO NOT PUT IT IN THE DISHWASHER.
